## Project A

### Vending Machine with Indian Style Tea Preparing

### Benchmark Machine: Lay's Potato Chip Vending Machine

**Design Brief:** Need to think and design mechanism for tea preparing process in form of Vending machine. Existing Tea vending machine used powder as a raw materials. Mostly in Indian people have that experience that vending machine tea never provided good taste compared to handmade tea preparation. So this was the opportunity to design a machine based tea preparing product. So this type of innovative vending machine required which can prepare and replica of handmade tea process style. The machine should include below all process as per below mentioned,

Water + Sugar+ Tea+ Spices+ Milk + boiling + Serve

**Project Mentor:** Bhavin Dabhi (Research & Product Design)
